About Company

Established in 2022, Rosewill Bome Technologies is committed to delivering tech solutions that empower businesses to thrive.

We are passionate about driving results through technology.

Our Mission

To provide reliable , secure and user-friendly technologies tailored to meet your specific needs.

Our Expertise

We specialize in;

- Management Information Systems - MIS
- Visualization dashboards

- Web design
- Web development
- Data Analytics

- API Integrations
- Mobile Application

Our Projects

TransportDienste Deluxe (Web Development)

Focused on creating an intuitive, user-friendly interface that aligns with Transportdienste Deluxe's high-end brand. This aimed in ensuring a seamless navigation, responsive design, and interactive elements, highlighting services like office moves, specialty transport, and storage.

Our Projects

BREFONS - Management Information System

Developed a Management Information System (MIS) for BREFONS, a strategic partnership initiative between IGAD and the African Development Bank. This program is designed to enhance resilience to drought and climate change, improve community well-being, and promote regional integration across six countries in the Horn of Africa. Due to security concerns, implementation is temporarily paused in Ethiopia and Sudan, with the first phase currently operational in Djibouti, Kenya, Somalia, and South Sudan.

Our Projects

Nakuru City Development Priorities Visualization System

Developed advanced data visualization platform (in collaboration with Geotechsys Africa Ltd) to make complex resilience data accessible and actionable for city planners and stakeholders. This system supports the Sustainable Working Group (SWG) project , and strengthens Nakuru's ability to plan for and respond to urban resilience challenges effectively by providing a comprehensive visualization of Nakuru Urban Resilience Data.

The platform was designed to aid the Nakuru City board in data-driven decision-making, enabling them to effectively monitor and manage urban resilience projects across Kenya.

OUR PROJECTS

Strengthening Civil Society Engagement for a Just and Sustainable Urbanization (SCEJU)

In collaboration with Geotechsys Africa Ltd, we oversaw the successful implementation of sustainable urbanization and social inclusion initiatives, a project funded by the European Union, across Makueni, Nakuru, and Kisumu. This role involved coordinating with stakeholders to foster impactful, community-driven urban development.

We were able to achieve project deliverables within the set timelines and budget, establishing a strong framework for sustainable urban growth and promote practices that prioritize social inclusion, setting a foundation for long-term, resilient urbanization in the regions.
